

Some plant and animal illustrations to help answer questions D3, DS and Extra Nature page 6

More posters on coastwatch.org Shellfish, Jellyfish, Seaweeds and IAS

Glasswort (*Salicornia*)

Green waxy or red-orange in Autumn. **S - H**

Cordgrass (*Spartina*) **A**

Forms dense upright clumps or fields. **S - H**

Seagrass (*Zostera*)

Soft grass with roots. *Z. marina* (1) long blades. **L-SU** *Z. Noltii* (2) fine lying on mudflats like thin wet lawn. **M**

Green seaweed

Mainly Ulvas. Tissue tube or thread-like. Attached by holdfast No roots. **H - L**

Brown & red seaweeds

Many species and many forms on rocks and other seaweeds.

JeUyfis

Many species. Tentacles with stinging cells.

Sea Anemones

Common beadlet anemone in and out of water. **M - L**

Crabs

Many species. Hide in cool moist areas. **H - Su**

Barnacles

Crustaceans where adults are permanently attached. **S - H**

Sea urchins

Common sea urchin (L). **L - Su**
Sea potato (R). **L - Su**

Starfish

Common starfish (L). **Su**
Brittle star (R). **Su**

Lug worm (*Arenicola*) cast

Worms live in sand & mudflat. Nursery at highest shore levels. **H - L**

Honeycomb reef (*Sabellaria*)

Worms build sand reefs, usually stuck to boulders/rocks. **L - Su**

Sand Mason (*Lanice*)

Buried worm, with top of shell/sand tube fringe visible. **M - Su**

Mussels (*Mytilus*)

Hold onto rock or seafloor by threads. **M - Su**

Native Oyster

On and half buried in sand or mud. **L-Su**

Gigas Oyster **A**

Shape varies: looks like native oyster if stuck to rock. **M - Su**

Razor Shell

3 species (one is our longest shell). **L - Su**

Cockles

Several species. In sand & mud. **M - Su**

Limpets

Chinese hats on rocks. Several species. **H - L**

Slipper limpet (*Crepidula*) **A**

Found on stones, on top of each other and other shellfish. **M - Su**

Dog whelk

Has an opening with siphon canal (not rounded like winkles). **M - L**

Shellfish eggs

Dog whelk 'skittles' (R). **M - L**
Common Whelk Egg ball (L). **Su**

Fish egg cases

Dogfish (L) often in clumps. Skate/ray (R) individual cases.

A Invasive Alien Species

SHORE LEVEL AT WHICH THESE USUALLY LIVE

S Splash Zone **M** Mid Shore **Su** Sublittoral
H High Shore **L** Low Shore
